NEW TRINITY CHURCH AT NEWARK.

The corporation of Trinity church, Newark, N. J., have just completed a building for Sabbath school and lecture purposes, on a part of their cemetery grounds in Rector street. This building was consecrated last Sabbath afternoon to the purposes for which it was erected. Rev. Pr. Neville, the rector, preached an instructive and interesting discourse, especially designed for the Sabbath school, which was collected on the occasion, from the text "It is a good thing." The preacher began by remarking that the best thing about this enterprise was that it was paid for. He enumerated many other good things about the new chapel that pleased the children and interested all. This lecture room is the neatest, in many respects, in the city, while it is as commodious as any. The principal audience room is provided with railroad seats. As a lecture room it will seat probably 300, perhaps 400 persons. A beautiful marble reading desk stands in front of open felding doors which connect this room with the rear apartment, which is devoted to the purpose of a library, everty room and Bible class room. By closing the doors the room is readily separated from the main front room. A beautiful organ ornaments the front room and adds to its usefulness for the purposes designed. In the room are ample Sabbath school and parish libraries, they are very large, and cannot be excelled for completeness. Over the new apartment is the infant school deartment—a fine room, provided with an amphitheatre of tiny sittings, where the dear little folks can sit and sing "Happy Land." This is one of the most useful, too. The building, as a whole, reflects much credit on the indefatigable and excellent rector, who pressed this work to completion, as well as on the wardens and vestry, and the entermolecture who have here exhibited most excellent taste and entire adaptedness to the purposes for which it was APPOINTMENTS OF THE PROVISIONAL BISHOP OF NEW

SHALL BISHOF ONDERDONK BE RESTORED?

The New York Observer says.—A movement is on foot in the Protestant Episcopal church in this diocese to effect the removal of the sentence from Bishop Onderdonk, restoring him to his Episcopal functions. The suspended bishop admits the justice of his sentence, expresses penitence for the past, and desires to be restored to the office he has lost. A petition is now in circulation among the clergymen and laymen of the diocese, setting forth their wishes that this may be done. Another movement is also on foot to have the New York diocese divided into two, the great amount of labor devolving on the provi-

sional bishop making such a division very desirable. It is believed that the two movements are seek ciated, the plan being to place Bishop Onderdonk over the office. Strong and the present provisional bishop over the office. Strong opposition will be made against this movement, vinithere were any way of dividing the diocese on the vinithere were any way of dividing the diocese on the viperior of clearly affinity, the matter might be harmonic. Superior of Bishop Onderdonk be gathered into one diocese, and the suspended bishop be restored and set over them. This would be gratifying to the feelings of his friends, and would save the feelings of those who cannot consent to be ruled again by this diocesan. It is said that the peace and integrity of the church are seriously threatened by these movements.

IMPOSTANT IMPROVEMENT
in putting 10
by Messrs, E. GOODWIN & BRO., of New York city.
TOBACCO, of the BEST QUALITY is selected, neatly wrapped in Tin FOIL, and PATENT PRESSED.
The great advantage of this over other brands consist in the size of the packages, rendering it more convenient to carry in the pocket, and by being PRESSED SOLID, it keeps MOIST and FRESH, retains its FULL, RICH FILAVOR, and improves in quality as it is used; while in other brands, as soon as the package is opened the quality rapidly DETERIORATES—the tobacco growing dry—and littering the pocket, to the great annovance of the consumer. The dressing which the PATENT TOBACCO undergoes in the process of manufacture, frees it from allgrif or importities so objectionable in the use of plug tobacco. Chewers will do well to give the patent pressed atrial and judge for themselves.
For sair by wholesale merchants, who receive it direct from the manufacturers.
